RACHIT NAMAN

+91 8210254779 | BIT Mesra, Ranchi | Email | LinkedIn | GitHub | LeetCode

EDUCATION

Bachelor of Technology, BIT MESRA, Ranchi — Expected 2027
Electrical and Electronics Engineering — CGPA: 8.09
Higher Education (Class 12), Delhi Public School, Dhanbad — 2021–2023

TECHNICAL SKILLS

Languages	C++, Python, JavaScript, TypeScript, SQL
Web Technologies	Next.js, React.js, FastAPI, HTML, CSS
AI/ML Frameworks	LangChain, LangGraph, RAG Pipeline
Core Concepts	Data Structures & Algorithms, OOP, Operating Systems, DBMS, Graph Databases
Databases & DevOps	Neo4j, Qdrant, Docker, Docker Compose, Git, CI/CD, WSL2

PROJECTS

AttackGraph — Attack Path Analysis Platform — Live | GitHub
Python, FastAPI, Neo4j, Qdrant, LangChain, LangGraph, Gemini, Next.js, Docker

- Architected a Graph RAG system combining Neo4j traversal with Qdrant vector search, **achieving high-precision threat context retrieval against a custom dataset of 200+ simulated network vulnerabilities**.
- Developed BFS/DFS-based graph traversal APIs for blast-radius assessment, **successfully mapping up to 7-hop privilege-escalation chains across 5,000+ mock nodes in under 300ms**.
- Designed a modular Neo4j schema (6 node types, 5 relationship types) with targeted indexing, **optimizing query plans to maintain sub-second latency on a generated database of 15,000+ entities**.
- Implemented hybrid semantic retrieval pairing dense vector search with Cypher queries, **reducing pipeline execution time by explicitly filtering vector space before LLM generation**.
- Built an interactive Next.js dashboard backed by asynchronous FastAPI endpoints, **capable of rendering 1,000+ dynamic graph elements with client-side frame rates above 30fps**.
- Containerized a LangGraph multi-agent pipeline with Docker Compose, **orchestrating 4 concurrent AI agents to generate structured remediation JSONs in under 5 seconds per threat**.

Signalist — Smart Stock Watchlist Platform — Live | GitHub
Next.js, React, TypeScript, Tailwind CSS, Inngest, Finnhub API, Better Auth, Vercel

- Engineered a scalable full-stack platform delivering real-time financial data for 10K+ stocks, **providing seamless and personalized market insights to users**.
- Designed event-driven workflows using Inngest to automate price alerts and daily market summaries, **increasing user engagement via timely notifications**.
- Implemented secure authentication and session management with Better Auth, **ensuring robust data integrity and secure user access**.

EXPERIENCE

Def-Space Summer Intern | *Bharat Space Education Research Centre (BSERC)* — June 2026 – August 2026

- Completed a 6-week applied research programme focused on defence-oriented systems and responsible innovation.
- Deployed AttackGraph as a capstone project to demonstrate graph-based threat modeling, **showcasing automated attack-path discovery capabilities for defence networks**.

Trainee | *BSNL, Hyderabad, India* — July 2024

- Mapped data transmission protocols across broadband infrastructures, **identifying key structural behaviors in complex network environments**.
- Assessed IoT cloud platforms and client-server systems, **evaluating frameworks for low-latency, real-time data communication**.

EXTRA-CURRICULAR ACTIVITIES

- **Tech Team Coordinator (IEEE, BIT Mesra):** Conducted a hands-on Python workshop for 100+ students, resulting in foundational programming proficiency for attendees.
- **Smart India Hackathon (SIH '24) Qualifier:** Engineered and presented technical solutions and functional prototypes to a panel of academic and industry experts.
